High West 7000' is an oat flavored vodka that originates high in our mountains as free-range snowmelt, naturally filtered in deep rock aquifers. This produces great tasting water with a well-balanced mineral content. The heart of High West 7000' comes from our favorite grain, oats. According to old manuals, distillers from the 1800's considered oats to make a superior tasting libation. Oats aren't used today because of their high cost and difficulty to distill - we think their subtle nutty and vanilla flavor is worth the extra effort. Our manually operated copper pot still gives us more deliberate control in selecting the most flavorful "heart" of the delicate oaten flavor. We blend our oat eau de vie with a sourced neutral spirit made from corn and our high mineral mountain water to create a silky smooth tasting vodka with a rich mouth feel.

High West Distillery & Saloon is Utah's first legal distillery since 1870 and the world's only ski-in gastro-distillery located at exactly 7000' at the base of the Town Lift in the heart of Old Town Park City, Utah. High West makes spirits for people who want great taste and appreciate quality ingredients, small batches, and the owner's personal touch. Our saloon is a quaint, family friendly, full-service restaurant and bar where visitors can refuel and refresh in our renovated 100-year-old livery stable and Victorian mining era home, both listed on the National Register of Historic Places. If you like great spirits, well made western alpine cuisine comfort food, and American roots music, you ought to come and visit us when you are in Park City.
